## COURSE SPECIFICATION

Course code	full-time programme: part-time programme:	<b>M#2-S1-ME-312</b>
Course title in Polish	<b>Podstawy obróbki plastycznej</b>	
Course title in English	<b>Fundamentals of metal forming</b>	
Valid from (academic year)	<b>2024/2025</b>	

## GENERAL INFORMATION

Programme of study	<b>MECHANICAL ENGINEERING</b>
Level of qualification	<b>first-cycle</b>
Type of education	<b>academic</b>
Mode of study	<b>full-time programme</b>
Specialism	<b>all</b>
Department responsible	<b>Department of Metal Science and Manufacturing Processes</b>
Course leader	<b>dr inż. Tomasz Miłek</b>
Approved by	<b>dr hab. Jakub Takosoglu, prof. PŚk, Dean of the Faculty of Mechatronics and Mechanical Engineering</b>

## COURSE OVERVIEW

Course type	<b>programme-specific</b>	
Course status	<b>compulsory</b>	
Language of instruction	<b>English</b>	
Semester of delivery	full-time programme	<b>Semester III</b>
	part-time programme	
Pre-requisites	<b>Technical Drawing, Material Science I</b>	
Examination required (YES/NO)	<b>NO</b>	
ECTS value	<b>1</b>	

Mode of instruction	lecture	class	laboratory	project	seminar
No. of hours per semester	full-time programme	15			
	part-time programme				

## LEARNING OUTCOMES

Politechnika Świętokrzyska  
Kielce University of Technology

Projekt „Dostosowanie kształcenia w Politechnice Świętokrzyskiej do potrzeb współczesnej gospodarki”  
nr FERS.01.05-IP.08-0234/23

Wydział Mechatroniki  
i Budowy Maszyn

Category of outcome	Outcome code	Course learning outcomes	Corresponding programme outcome code
Knowledge	W01	On completion of the course, students will have a fundamental theoretical knowledge of cold and hot metal forming processes by using different machinery.	MiBM1_W06 MiBM1_W07
	W02	Having successfully completed this course, students will be able to use acquired theoretical knowledge to select a type of metal forming technology in order to manufacture mechanical elements of a given shape.	MiBM1_W06 MiBM1_W07
Competence	K01	Students are aware of the need to critically assess and update their expertise from metal forming and by exchanging knowledge and experiences with other metal forming experts	MiBM1_K01

## COURSE CONTENT

Type of instruction lecture	Topics covered
lecture	<p>Introduction to metal forming : definition, advantages of disadvantages, classifications of metal forming processes on basis different criterias, examples of metal forming products, applications, elastic and plastic deformations of material.</p> <p>Classification of forming methods of draw pieces, classification of processes of shaping on presses, discussion of selected processes: deep drawing, redrawing, blanking, bending (definitions, schematic representations, methods, degrees of deformations, technological parameters, advantages and limitations).</p> <p>Selected problems of forming methods from sheets: total coefficient of deep drawing, types of shearing processes, the most significant sheet-bending processes course of V- and U-die bending processes.</p> <p>Discussion of drawing processes: definitions, schematic representation of the wire drawing process, methods of tube drawing process - schemes and characteristic of processes, degrees of deformation, drawing machines , advantages and limitations of drawing process.</p> <p>Rolling: classifications on the basis of kinematics, tool geometry, and workpiece geometry; schematic representations for longitudinal, cross and skewed rolling; flat rolling and profile rolling; geometrical relationship for longitudinal rolling; degrees of deformation of material after rolling ; gripping condition; discussion of forward slip phenomenon; advantages and limitations of rolling process.</p> <p>Extrusion process: classification depending upon the direction of material flow in relation to the tool movement direction, definitions, schematic representations, degrees of deformation, advantages and limitations of extrusion process.</p> <p>Forging process, classifications, definitions, schematic representations, machines, advantages and limitations of forging process.</p>

## ASSESSMENT METHODS

Outcome code	Methods of assessment (Mark with an X where applicable)					
	Oral examination	Written examination	Test	Project	Report	Other
W01			X			
W02			X			
K01						X

## ASSESSMENT TYPE AND CRITERIA

Mode of instruction	Assessment type	Assessment criteria
lecture	non-examination assessment	The pass mark is a minimum of 50% for the final in-class test

## OVERALL STUDENT WORKLOAD

ECTS weighting												
No.	Activity type	Student workload										Unit
		full-time programme					part-time programme					
1.	Scheduled contact hours	L	C	Lb	P	S	L	C	Lb	P	S	h
		15										
2.	Other contact hours (office hours, examination)	2										h
3.	<b>Total number of contact hours</b>	<b>17</b>										h
4.	<b>Number of ECTS credits for contact hours</b>	<b>0,7</b>										ECTS
5.	<b>Number of independent study hours</b>	<b>8</b>										h
6.	<b>Number of ECTS credits for independent study hours</b>	<b>0,3</b>										ECTS
7.	<b>Number of practical hours</b>	<b>0</b>										h
8.	<b>Number of ECTS credits for practical hours</b>	<b>0,0</b>										ECTS
9.	<b>Total study time</b>	<b>25</b>										h
10.	<b>ECTS credits for the course</b> <i>1 ECTS credit = 25-30 hours of study time</i>	<b>1</b>										ECTS
